Janet:

Oops! Good catch. Sorry about that. I am sending you a revised document. I updated the date too, but otherwise the only change was to the permit number in the header.

Catherine

 ING080000

Catherine,

I am going through all these GP submissions for an internal briefing/status paper since we just got an Supplement to the IN Withdrawal Petition from enviros.

I noticed that the number on the actual file for GW PR general permit file is ING250000 the same number used for Once Through Non Contact Cooling Water discharges.

Could you let me know which permit numbers are correct for these 2 sectors. I don't want to assume it's the number below without checking.

Thanks

Janet

**Subject:** Indiana Revised Draft General Permit for Ground Water Petroleum Remediation ING080000

Steve:

I am transmitting to you this afternoon our revised draft general permit and fact sheet for Ground Water Petroleum Remediation Systems ING080000. As I believe you are aware, we have been working on making some major structural changes to the general permit template, so we are sending these revised documents back to you at U.S. EPA Region 5 so that your staff can review them as per our MOA.

Janet, I have included you on this email because I have heard that Steve is on a temporary re-assignment, and I'm not certain who would be the appropriate recipient. I would appreciate it if you could make sure that these documents are forwarded to the appropriate person.

I would appreciate knowing which "lucky" staff person gets to review these documents. As always, please feel free to contact me if there are any questions along the way.

Catherine Hess, Chief

Permits Administration Section

Office of Water Quality
